COOPER&HUNTER

With more than 25 years of experience in air conditioning and ventilation, Cooper&Hunter has grown into a leading HVAC market player. The brand is dedicated to technological innovation and consumer-driven product development, generating HVAC equipment that adheres to the highest quality standards, providing reliable, energy-efficient, and cost-effective air conditioning solutions.

While products under the Cooper&Hunter brand are distributed in more than 55 countries worldwide, the brand's growth within the US market has been rapid. Cooper&Hunter stands out from big-name brands by providing quality support to customers and technicians alike, with their in-house technical support team offering troubleshooting and warranty support Monday through Friday from 9am to 5pm in 5 different languages (including English, Spanish, Mandarin, Russian, and Ukrainian).

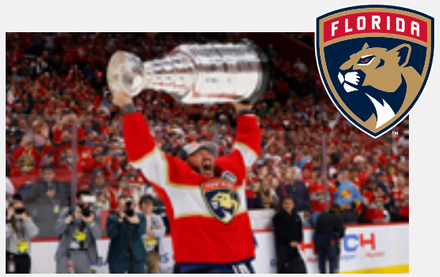
COOPER&HUNTER SPONSORSHIPS

Cooper&Hunter is proud to sponsor the New York Yankees, NASCAR, Florida Panthers, and Miami Zoo because these partnerships reflect our commitment to excellence, innovation, and community engagement. The New York Yankees represent a storied legacy of success and ambition, while NASCAR embodies the thrill of speed and precision engineering—both values we share. Supporting the Florida Panthers aligns with our dedication to teamwork and perseverance, and our partnership with the Miami Zoo highlights our commitment to environmental sustainability and education. Together, these sponsorships allow us to connect with diverse audiences, celebrate shared values, and foster a sense of community across different arenas.



Florida Panthers Celebrate Victory!

Once again, Cooper&Hunter has re-newed our Sponsorship Agreement with the Florida Panthers. Just Recently, after a 30-year journey, the Panthers finally etched their name in hockey history, avoiding a collapse after losing three consecutive games. The Florida Panthers clinched their first-ever Stanley Cup title! In a thrilling Game 7 showdown against the Edmonton Oilers, the Panthers secured a hard-fought 2-1 victory.

HVAC Meets High-Octane!

We are thrilled to continue our sponsorship with MBM Motorsports, a team we deeply admire and respect for their achievements and values. Supporting **Chad Finchum**, an HVAC Technician, Client, and Nascar Driver, who has consistently demonstrated his skills and talent in the sport, is a source of pride for us. We believe this partnership perfectly represents the synergy between HVAC excellence and NASCAR speed.

Home Run Collaboration!

Cooper&Hunter is thrilled to announce our renewed sponsorship of the New York Yankees! They did an outstanding job in 2024, winning the East and American leagues again. We are confident that this partnership will continue to thrive in 2025. Our collaboration with the Yankees aligns perfectly with our brand's values of striving for excellence and innovation. We look forward to supporting the team in their future endeavors and continuing to engage with the community through this prestigious partnership.

Chilling with Nature!

Cooper&Hunter is proud to sponsor the Miami Zoo Foundation, the non-profit partner of Zoo Miami. This sponsorship aligns with Cooper&Hunter's mission to support wildlife conservation, environmental sustainability, and community engagement. Additionally, as HVAC experts, Cooper&Hunter has provided Astoria units for optimal climate control in various animal habitats, ensuring a comfortable and healthy environment for the animals.

DIP SWITCH: ENC1 dip switch is used for capacity change.

When matching with single zone condensers, the indoor unit will automatically adjust to 6,000 BTU/H, 9,000 BTU/H or 12,000 BTU/H according to condensers capacity.

When matching with multi-zone condensers, it needs to set the ENC1. Change the capacity of indoor unit to 6,000 BTU/H by adjusting the dip switch ENC1 from "0" to "1". Change the capacity of indoor unit to 9,000 BTU/H by adjusting the dip switch ENC1 from "0" to "2". Change the capacity of indoor unit to 12,000 BTU/H by adjusting the dip switch ENC1 from "0" to "3".

Dip switch change for 6,000BTU/H

(Default setting **"0"**) (Dip switch change to be **"1"** for **6,000BTU/H**)

Dip switch change for 9,000BTU/H

(Default setting **"0"**) (Dip switch change to be **"2"** for **9,000BTU/H**)

Dip switch changefor 12,000BTU/H

(Default setting **"0"**) (Dip switch change to be **"3"** for **12,000BTU/H**)

PEAQ

MULTI-VOLTAGE AIR HANDLER UNIT

AHU 18K, 24K, 33K, 36K, 48K, 55K Btu/h

ADAPTIVE MULTI-VOLTAGE - 115V & 208-230V: All in one 115/208-230V Automatically identifying the required voltage without the need for manual conversion, eliminating the hassle of rewiring.

M-COIL: 2% Airflow difference between evaporators less than 0.02 in. W.C. pressure drop.

TU1 COPPER TUBES: Oxygen-free copper with higher purity copper content of over 99.97%, providing excellent electrical and thermal conductivity and superior corrosion and cold resistance.

SYMMETRIC FAN BLOWER DESIGN: Optimized structure brings even airflow and higher efficiency heat exchange.

SLIMMER INDOOR UNITS: The same width as most gas furnaces 14.5"-21.5" making the PEAQ unit an ideal replacement for your gas furnace.

AUXILIARY HEATER: Purchased separately as a backup heat option for indoor units, available in 5kW, 10kW, 15kW, and 20kW models.

REFRIGERANT LEAK SENSORS: Protects the compressor from damage due to refrigerant leaks by alerting user with error code "EC".

WIRED THERMOSTAT CONTROLLER INCLUDED: Also compatible with most third party 24V wired thermostats.

SMART KIT BUILT-IN: C&H's Smart Kit enables control from anywhere with C&H Remote app using any IOS or Android smart device.

TRUE MULTI-POSITION AIR HANDLER: Unit can be installed in Horizontal or Vertical, upward or downward positions for optimal space usage.

NEW INVERTER TECHNOLOGY: NEW Inverter Algorithm can analyze more factors, including temperature difference and the tendency of temperature difference changes, with a more frequent temperature detection to guarantee a more accurate and smooth control of the compressor output.

EXTRAORDINARY COLD CLIMATE HEATING PERFORMANCE: True high performance hyper units provide 100% heating output at 0°F.

GOLD FIN: Gold coating in the condenser withstands salty air, rain and other corrosive elements, preventing bacteria growth.

DRAIN PAN HEATER: Factory installed drain pan heater in outdoor unit prevents ice accumulation, improving heat transfer efficiency.

ULTRA EFFICIENT DISCHARGE FAN: The horizontal fan and vertical heat exchanger guarantee more uniform and efficient heat exchanging velocity across the entire heat exchanger surface, preventing frost on the compressor's coils.

DELAY FUSE: A detachable delay fuse added to the system protects the wire set from outdoor to indoor, preventing overcurrent.

REGULAR MULTI-ZONE
Heat Pump Outdoor Unit

The C&H Multi-Zone systems with inverter technology are some of today's most advanced ductless split heat pumps. Up to 6 indoor units can be connected to a single outdoor unit, reducing the number of outdoor units required. All indoor units can be individually controlled and do not need to be installed at the same time.

HYPER MULTI-ZONE
Heat Pump Outdoor Unit

With our modern heat pump technology, the Hyper Heat series offers dependable cooling with the capability to heat in ambient temperatures as low as -22°F, making it an excellent energy-efficient solution for colder climates.

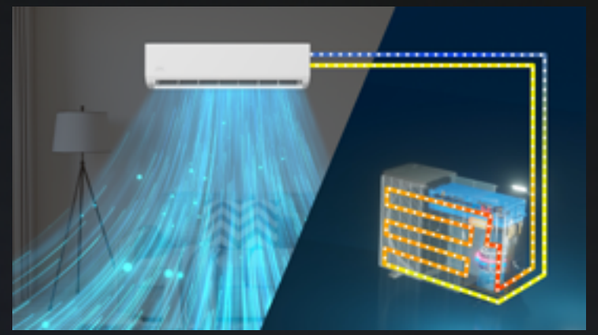
INVERTER TECHNOLOGY *Simplified*

Inverter technology is a type of technology used in heat pump outdoor units allowing the compressor to run at variable speeds, rather than just on or off. The heat pump can adjust its output to match the heating or cooling needs of the space it is serving, leading to increased efficiency and energy savings.



Inverter technology uses a device called the variable frequency drive (VFD) to control the frequency of the incoming electrical current that goes to the appliance. The VFD contains a small part called an inverter that converts the AC power supplied by house sockets to DC. While the energy flow is still in DC, it gives an opportunity for the VFD to change the frequency from the standard 60Hz to whatever power is needed by the appliance's motor. In addition, inverter technology uses a process called "flash injection" to allow the heat pump to produce superior heating. The flash injection process uses a bypass circuit to reroute a portion of the refrigerant to two places. Hot refrigerant flows back to the indoor coil to enhance heating. Colder refrigerant is injected back into the compressor to allow it to run at faster speeds to produce high-performance heat exchange. This technology also guarantees quiet and efficient operation for outdoor and indoor units.

This process of conserving energy by using less power, while still delivering better results is achieved through constant movement, which can save up to 40% of energy consumption.

The efficiency of inverter technology also extends into the longevity of the unit and low maintenance, all thanks to the unit running under low demand.

Smart KIT

The Cooper&Hunter Smart Kit includes an Easy-to-Install USB adapter that connects inside the unit to enable wireless remote control function for Wall Mounted Mini Split Units. In addition, when used with the downloadable C&H Remote App, the units can be controlled with any smart device from any location. The Smart Kit is compatible with the Astoria, Olivia, Olivia Midnight and Mia indoor units.

Remote Control Devices

This newly designed remote control is specifically utilized with the PTAC Units. The LCD screen will display basic functions on this controller including Mode, Temperature Control, Timer, and Fan Speed. A small sensor located on the back of the control will read the room temperature and adjust the settings accordingly.

PTAC Remote Control

Our newest Remote Control has the capability of operating most of the Cooper&Hunter indoor Mini Splits in both, Single and Multi-Zones. Its advanced technology allows for additional functions, such as Eco Mode, Breeze Away, Self Cleaning Mode, Sleep Mode, Follow Me Mode, Turbo and Lock mode. Functions to control horizontal and vertical the swing of louvers is also included in this Remote.

C&H Universal Control

Smart Wired Thermostat

In addition to the features offered in the wired thermostat, the feature that sets the new 12V wall thermostat apart from the previous models is its ability to connect to the internet and provide compatible units with remote connectivity through the Cooper&Hunter App, allowing you to control your air conditioning your smartphone or tablet, wherever you are.
